**Colorado Renewable Energy Society, Jeffco Chapter**

# Taking the Climate Challenge

How to create concrete plans to  
lower your climate impact

## ROBERT CASTELLINO

Founder, CLIMATE COLORADO

### Thur. Jan 28

7pm – free

Jefferson Unitarian Church 14350 W. 32nd Ave, Golden (Applewood)

**Government action on Climate Change too slow for you?**

**That's why citizens need to start reducing their climate impact on their end with a personal committment and by pushing local initiatives.**

Robert Castellino is introducing us to “rapid prototyping” where participants split up into groups to quickly work out a plan that leads to specific, measurable solutions. He'll challenge the audience to explore one of four or more challenges such as Energy Efficiency, Water Efficiency, Solar Systems, or volunteering with climate organizations.

Climate Colorado will offer to monitor progress on the plans developed that evening over time.
