

This is a heads up that the Jefferson Unitarian Green Task Force has scheduled an educational forum to present a pro and con presentation on fracking. Paul Belanger who is very knowledgeable in this area and has done research in paleoclimatology will moderate. Other panel members will come from industry and the Sierra Club.

The event is scheduled for October 6 at 7:00 in the sanctuary. Mail-in ballots for the November election will go out between October 14 and 16, so this forum should give attendees plenty of information to think about before they fill out their ballots. It will be open to the wider community as well as friends and members of JUC. Mark your calendars and invite your friends. This will be an excellent educational opportunity. We will be sending information to members of the UU Denver-Boulder cluster and will be posting on a variety of web sites.

Please contact me if you are checked out on the sanctuary sound system and are willing to run the system for this event. Thanks so much.
