

Earth's Climate: Past, Present and Future
OLLI Central: week 5, 4/27/2016
Paul Belanger

**Skepticism vs. Denial: The issues, the
disinformation campaign and its psychology**

- 1. 13 Misconceptions about Global Warming**
- 2. Five characteristics of science denial**
- 3. The Psychology of denial – The Worldview Backfire Effect**
- 4. Industry positions: past and present**
- 5. Disinformation campaigns and motivations**
- 6. Solutions; among them: Carbon Fee and Dividend**

13 Misconceptions About Global Warming

<https://www.youtube.com/watch?v=OWXoRSIxyIU&feature=youtu.be>

Five characteristics of science denial: FLICC

- <https://www.youtube.com/watch?v=wXA777yUndQ&feature=youtu.be>

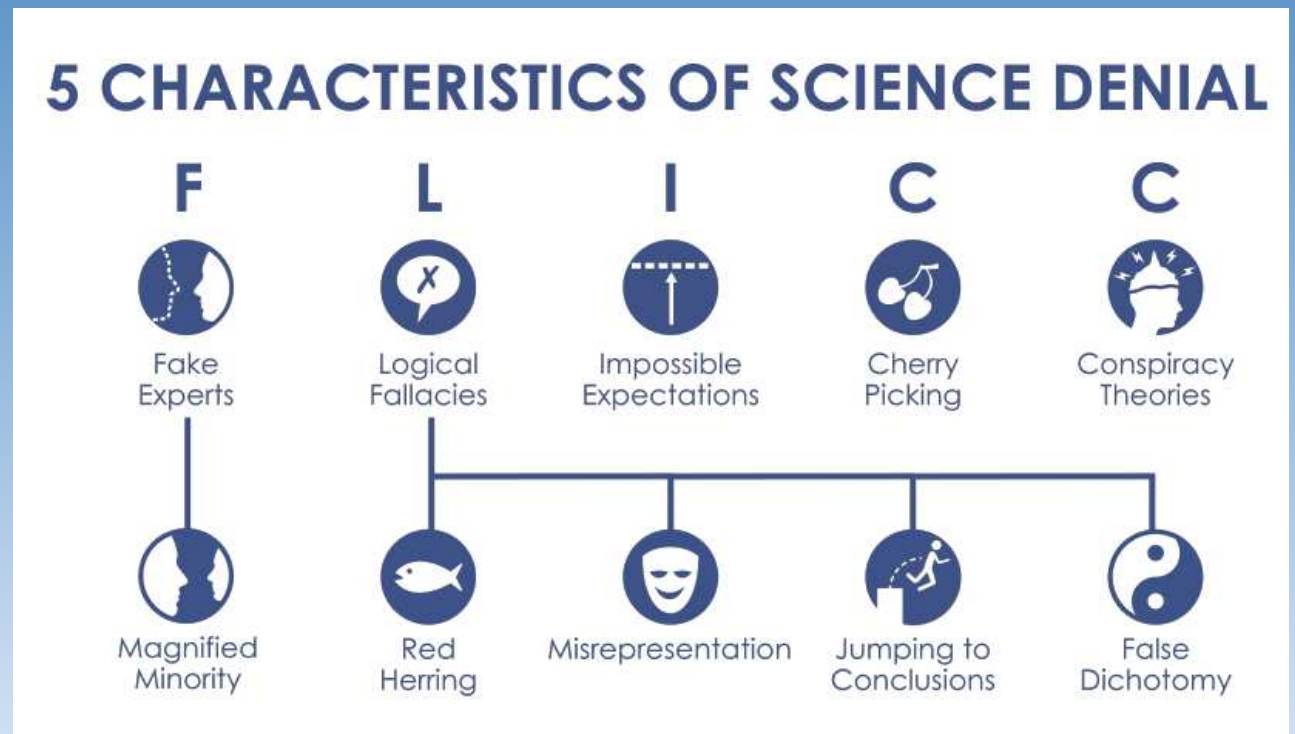

Scientific

skepticism/conclusions:

- data/consider the evidence,
- Hypothesize and test,
- come to a conclusion as the evidence becomes overwhelming

Denial arguments presented as if real skepticism:

- Have a conclusion 1st
- Deny the evidence / ignore the data

Quick review

- **Kerry Emanuel video – hoping you’ll find it useful:**

Week 4 20 point NAS-Royal Academy PowerPoint or PDF:

- [Belanger joint NAS-Royal Society answers to 20 points Pptx](#); or [Belanger joint NAS-Royal Society answers to 20 points pdf](#)

Why I've come to my conclusions

- I've studied and generated data about climate
- I've looked at the data:
 - Isotopes of Oxygen and Carbon: forams and ice core
 - CO₂ data (ice core) and CO₂ proxy data
 - Milankovitch Orbital parameters
 - Time trends
 - Exceptions: PETM and other hyperthermals, Azolla, etc.
- And concluded that the science is sound and gives me reason for concern.
- One has to step back to not be bothered by minutes "curves" in how it's going to happen....but there are solutions

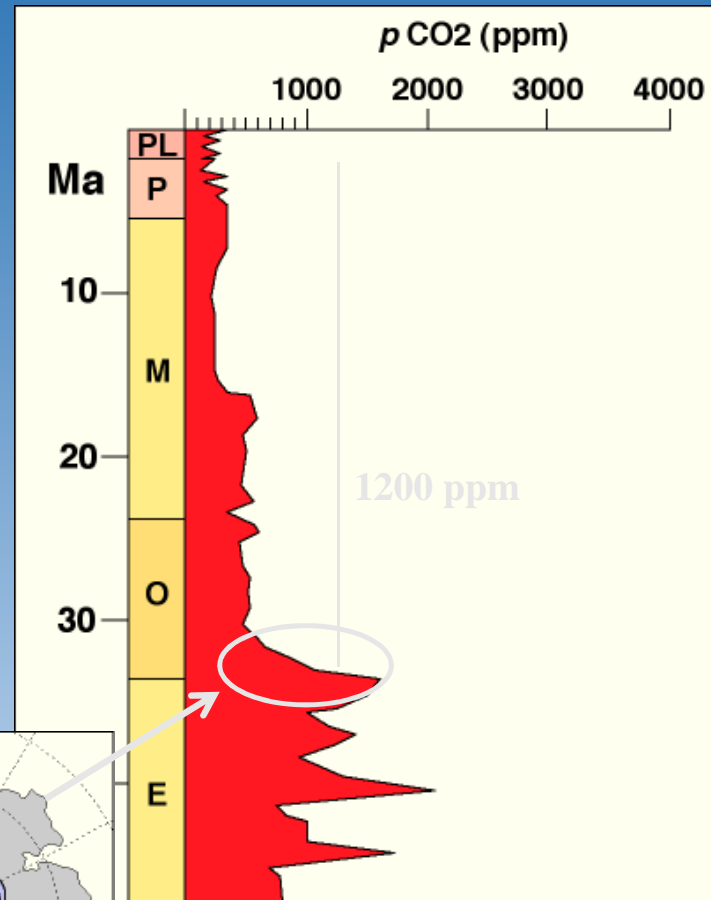

DATA

CONJECTURE

1200 ppm

minor glaciation

J. Bujak, personal comm.

CONJECTURE

800 ppm

increased glaciation

fall in CO₂

J. Bujak, personal comm.

extensive continental glaciation

fall in CO₂

CONJECTURE

J. Bujak, personal comm.

can this be used to predict the effect of future increases in CO₂ on Antarctic deglaciation?

J. Bujak, personal comm.

triggering the shift
from supergreenhouse
towards the modern
icehouse state at
base Middle Eocene

J. Bujak, personal comm.

Climate Changes from Ocean Sediment Cores, since 5 Ma. Milankovitch Cycles

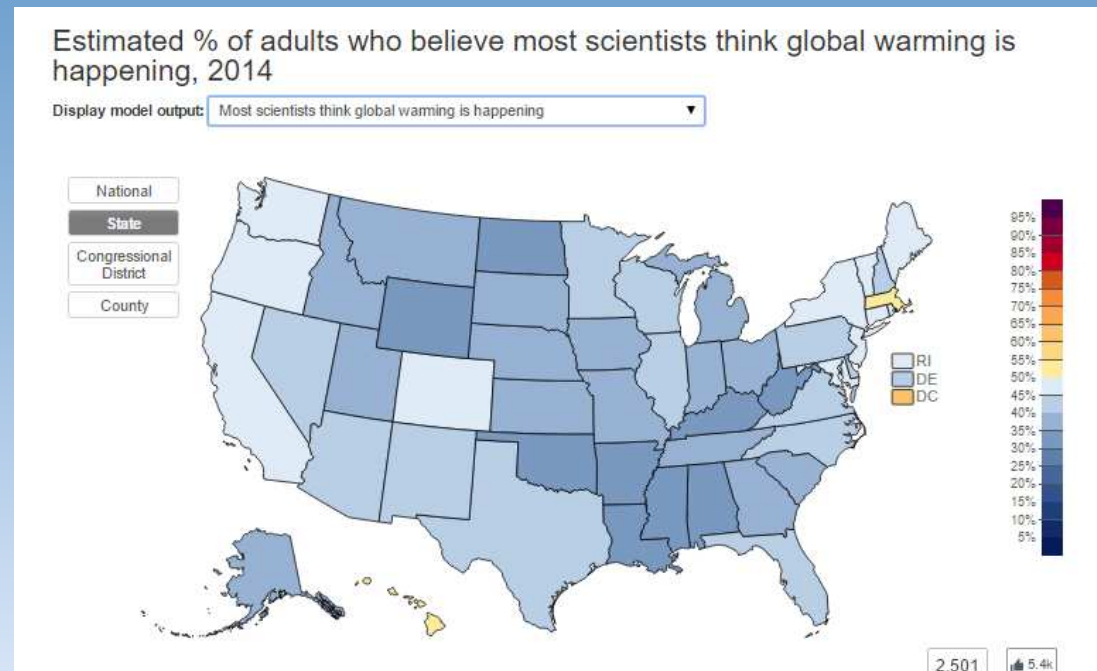

When CO₂ levels get below ~400-600 ppm Orbital parameters become more important than CO₂

Climate Change Denial/Disinformation

The Heartland Institute

- The Heartland Institute is a 31 year old national nonprofit organization devoted to discovering, developing, and promoting free market solutions to social and economic problems.
- “The primary American organization pushing climate change skepticism.” The NY Times
- “The world’s most prominent think tank supporting skepticism about man-made climate change.” The Economist

Climate Change Denial

Senator James Inhofe

- Republican from Oklahoma
- Representative from 1986-1994
- Senator from 1994 to present
- Chairman of US Senate Committee on Environment and Public Works from 2003-2007 and from 2015-present
- Author of *The Greatest Hoax: How the Global Warming Conspiracy Threatens Your Future*
- Quote: “[Because] God’s still up there, [the] arrogance of people to think that we, human beings, would be able to change what He is doing in the climate is outrageous.”
- Keynote 5/2015 Heartland Inst. Speaker:
<https://www.youtube.com/watch?v=BjVx3PeBIEM>

Courtesy of Gary Wyngarden: Capitalism vs. the Planet

Heartland Institute Background

- James Taylor lobbyist against Renewable mandates
- “Rachel was Wrong” defending continued use of DDT
- Long involvement in defense of the tobacco industry
- “Heartland does many things that benefit Phillip Morris’ bottom line, things that no other organization does.” (solicitation of funding from Heartland’s president to Phillip Morris.)
- Phillip Morris on Heartland’s board and a major contributor.

Heartland's President

- Joseph Bast only president since founding in 1984
- “Joe Camel is Innocent”
- “Five Lies About Tobacco”
- “smoking in moderation has few if any adverse health effects”
- “FDA and EPA use junk science”

Courtesy of Gary Wyngarden: Capitalism vs. the Planet

Heartland's Climate Change Expert

- Dr. Willie Soon has PhD from USC in Aerospace Engineering and is a part-time employee of the Harvard-Smithsonian Center for Astrophysics
- Believes global warming is caused by solar variation as opposed to human activity
- Climate scientists have rebutted his arguments and the Smithsonian does not support his conclusions.
- Soon has received over \$1,000,000 from petroleum and coal interests since 2001 including the American Petroleum Institute, Koch Foundation, Exxon Mobil, Electric Power Research Institute
- Failed to disclose conflicts of interest
