Subject: RE: biochar

Importance: High

Hi Paul

You can pick up biochar in many locations in Colorado both wholesale and retail .

I appreciate you asking at Echter's and Otoole's – please let them know that they can get biochar and biochar blended products under the label –

Walden Organics – based in Walden Colorado

Distributed by GardnWise – or direct from Confluence Energy/Walden Organics

As I mentioned in my previous email you can get products from:

Windy point mountain flowers in Morrison

All Colorado Jax home and ranch locations

ACW supply – on Bryant in Denver

Most Colorado – MURDOCHS locations carry – EcoPett Coop – this is a chicken coop bedding that has biochar in it

***many more locations than I can rattle off**

Dons – Colorado springs

Ranch Foods Direct – Colorado Springs

Happy Life – Evans

Bath Garden Center – Fort Collins

Harmony Gardens – Fort Collins

Stutz and Copeland – Boulder

McConnell Green House – Lafayette

Urban Garden Center – Louisville

Glenwood Gardens – Glenwood Springs

Taddikin Tree Service – Boulder Colorado

Native Roots – Durango

..... more that I don't recall....

Way To Grow carries a biochar product that is pure biochar

Frankly biochar by itself is not a great consumer friendly product as it needs to be partnered with other products for various reasons beyond the scope of this email and my current time frame.

We also have products in – Depot- Lowes – Ace – True Value – Tractor Supply—At this time they do not have products with biochar in them but I am working on it – these companies have a 24 month onboarding process for on shelf retail business. That is competitive and rolling in nature. I see about a 50% year on year growth of sales. Keep in mind the history of the wind industry where in 1978 there was MW scale wind machines in Wyoming and not until the mid-2000's was that sector scaled and commercial, 30 years at least. Biochar has been in a nascent but growing state from 2007.

I appreciate your interest and support very much.

Warm Regards,
Jonah Levine
